QA'd the grid map to our data & ADEQ's data the same way you and I did it yesterday. Everything still matching up to our final map.

Okay, how about Sediment 4 in Grid A1, that should be highlighted to 6 inches for Pb, and where does Sediment 3 fall, Grid B1 or C1?

I have no idea why he changed D5, but it's been corrected.

Changes weren't major. We lost A1, not going as deep in A8, and added F2. I'm heading downtown to EPA headquarters to drop-off some invoices and CDs. I should be there about 10:30. Let me know if you want meet up to go over anything.

You will need to add the ADEQ ESI data from the tables they provided to fill in the areas that we did not sample at. They have surface, sub-surface and sediment sample data for the site and the adjacent creek on the west side. The data is from 2012 and 2015. Here is the ESI again and additional sampling data.
